

# IRRICAD FastQuote Version 4

IRRIGATION DESIGN SOFTWARE SPECIFICALLY FOR SMALL TURF AND LANDSCAPE

## New Features in IRRICAD FastQuote Version 4:

### Integrated Drip Tapes

FastQuote version 4.0 now allows tapes to be entered and treated as a single entity.

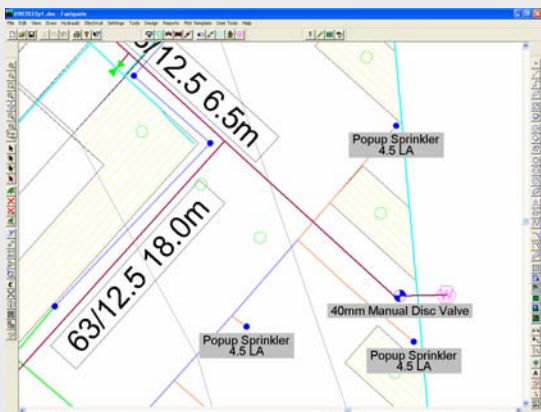

### Automatic Labelling

FastQuote version 4.0 has the facility to automatically label:-

- Pipes
- Tapes
- Junctions
- Valves
- Outlets
- Miscellaneous Hydraulic Items
- Contour Lines
- Spot Heights
- Irrigation Areas
- Wires
- Electrical

Labels may be formatted in many different ways

### New Look Reports

- A more professional look!
- Reports are fully formatted for printed output.
- Customise the appearance and content of reports.

Zone Name: Zone no. 1		
Length/Number	Description	Value/Price
29.2	40mm PVC Class 4	948.000000

### New Navigation Tools

- Improved Pan and Zooming using the scroll bars and mouse wheel
- Snap tools may be used when placing Hydraulic items
- Frequently used snap tools can be set as running snaps, so that the same snaps do not have to be selected repeatedly.

### Toolbars

Toolbars provide a fast and convenient way of accessing commonly used commands and tools, Version 4 includes many more Toolbars and Toolbar buttons than previous versions. The location, style and content of these Toolbars can be customised to suit your preferences.

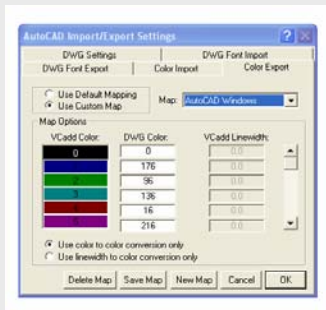

## **New Image (Bitmap) Functions**

- Export your plans in pdf format to send them electronically to clients in a non-editable format.
- Improved linkages between image files and designs (this avoids issues when designs are relocated to a different path)
- Import a wide range of image formats directly, e.g. .bmp, .jpg, and tiff files.
- Export files in a wide range of image formats, e.g. .bmp, .jpg, and tiff files.
- Improved scaling, repairing and rebuilding of images.

## **Improved DXF/DWG handling**

- For All Versions Up To And Including Autocad 2002
- Improved control over dxf / dwg conversion

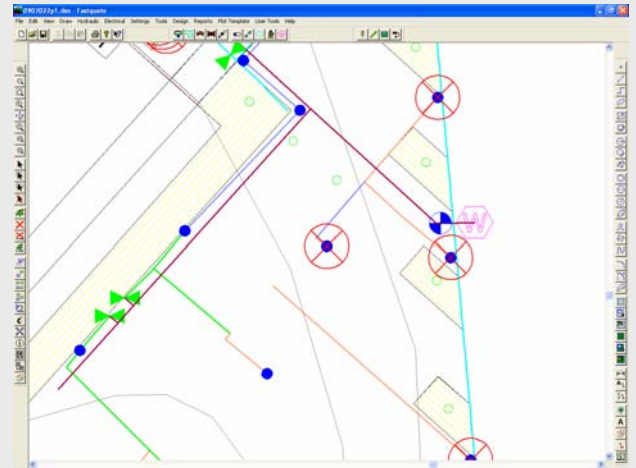

## **Improved Autosave / Autobackup**

Have you had trouble recovering a design?  
FastQuote version 4.0 saves a backup copy of each design, increasing the chances of recovery. Backup designs are now saved to a convenient folder location.

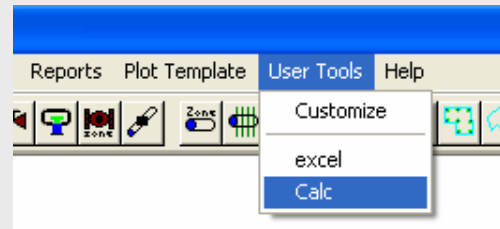

## **Visual Representation of Connectivity of Design**

This enables the designer to quickly identify unconnected hydraulic items.

## **Other Features And Improvements**

- The "User Tools" menu item allows menu items to be added to Irricad for commonly used external programs (for example the Windows Calculator or Excel)

- Many other minor improvements and bug fixes – these are documented in the readme.txt file for Version 4.
