

# IRRICAD 14

## IRRICAD's latest upgrade is here!

- ➤ Seamless Import from Google Earth!!
- View Your Pipe System in Google Earth!
- Automatic Sprinkler Placement Using Tree Blocks to Specify Sprinkler Locations!
- > Rationalisation of Telescoped Submain Sizing
- > Improved Speed for Large Designs
- Improved AutoCAD compatibility

### **IRRICAD 14: What's New**

IRRICAD Pro 14 is the latest major release of IRRICAD the leading irrigation design platform. We've worked hard to bring you a range of new functionality and user experience improvements.

#### IMPORT FROM GOOGLE EARTH

- Seamlessly import the image and elevations directly into IRRICAD via the new "Import from Google Earth" function.
- Click a button in IRRICAD specify the required area in Google Earth and IRRICAD will import it and geoposition the image including the Google Earth spot heights.

#### **VIEW IN GOOGLE EARTH**

- Send your design file directly to Google Earth to view on top of the satellite imagery.
- Save a design in the format used by Google Earth.
  Then send it to a client or open it in Google Earth at your leisure.

## AUTOMATIC SPRINKLER PLACEMENT FOR TREE BLOCKS

 For many tree crops or plantations the irrigation design starts with a grid of tree or plant positions. IRRICAD Version 14 has a new tool which uses a Tree Block to drive the placement of sprinklers, emitters, and lateral pipes.

#### LARGE DESIGN IMPROVEMENTS

- Increased support for large designs with enhanced loading, zooming and panning functionality.
- Enhancements for designs with extremely large GIS coordinates.

#### **RATIONALISATION OF TELESCOPING SIZES**

 Improved telescoping in submains and zones. After suitable sizes have been selected via LP Design IRRICAD logically rearranges pipes for practical installation. This will minimise user customisation after designing.

#### **AUTOCAD COMPATIBILITY**

- Seamlessly import AutoCAD 2013 files.
- Enhanced elevation importation.

#### **ALSO INCLUDED**

- Recovery Options Should a problem occur easily recover the design with the click of a button.
- Client information and addresses display in full in Reports.
- SHIFT keyword enabled for valves and mainline outlets.
- Globally add and change fittings in electrical items including listing fittings and subcomponents as an easy reference for installation.

#### **MORE INFORMATION**

You can read more on changes and new features in Version 14 in the <u>Recent Developments</u> and <u>Latest Enhancements</u> on our website.

#### **UPGRADE PRICING**

Upgrade pricing from previous versions as below (ex. GST)

Version 13	Version 12	Version 10, 10.5 or 11	Version 7, 8, 9 or 9.5
\$645	\$1,195	\$1,595	\$2,595

Also, a reminder that when you purchase IRRICAD Pro 14 you will continue to receive free priority support and patch releases for 12 months as well as 2 hours of one-to-one online training to help you make the most of the new features (conditions apply).
