IRRIGATION DESIGN SOFTWARE

What's New in IRRICAD 15:

We've worked hard to bring you a range of new features and user experience improvements in IRRICAD Pro Version 15.

SCREEN SELECTION BASED REPORTING

- Select a portion of the design and the Bill of Materials or Costing reports will only include the selected items and their costs!

VALVE-IN-HEAD BLOCK TOOL

- Need to set up a block of valve-in-head sprinklers? Version 15 introduces the sprayline block tool for mainline outlets. Each mainline sprinkler is automatically assigned a zone name for easy operational management.

REPORTING ON TOTAL COSTS OF EACH DESIGN

- How much does it cost to run the system over time? Now IRRICAD will report the annual running cost and also the annualised total costs. The capital and power costs, interest rate, and period of time are defined by you. Use this feature to compare the total cost between different design options or show the client the total cost of the system.

- Include the running costs of the water supply without adding a pump on to the design. You can view the annual running costs in the economic reporting, available in selected Bill of Materials and Costing reports.

ADD MISCELLANEOUS ITEMS TO DESIGN COSTINGS

- Additional items now can be seamlessly added to your plan for Bill of Materials and Costing reports via the new "Miscellaneous Costs" tool.

EVEN FLOW RATE VALVE PLACEMENT

- Require a valve to be centrally placed based on water flow in an irregular block? With the new placement option in the Irrigation Block tools you can automatically place a valve to have the same amount of flow on either side.

ALSO INCLUDED

- **Headlands and sidelands options** added to block tools
- **Create multiple pressure or flow maps** in one action
- **Pipe Reductions at outlets**
- **New toolbar icons** – a Zone Design Configuration icon and a Show Flow icon have been included
- **New Report toolbar** for one-click reporting
- **Object Info dialog box retains user-defined size between IRRICAD sessions**
- **Duplicate Symbol tool**
- **Many other minor improvements and fixes.**

Additionally, we plan to include a report on Travel Time for fertigation later in the year.

MORE INFORMATION

You can read more about the IRRICAD 15 changes and new features in the Recent Developments and Latest Enhancements on our website.

UPGRADE PRICING

Upgrade pricing from previous versions as below
